Mounica Reddy Poondla
Avani Kapa
Sirisha Ayyagari

Introduction:

For the success of any business, an obvious maintenance of records is very much necessary. A good application to maintain and note these records will make the calling very easy. This is web application which will be used by UMKC to provide best possible services to faculty members.

Web Service:

Make Payment:

Payment for the order is paid through check or online banking. Once payment is received to the merchant, he will process the order.

Degree of importance: Not Essential

Difficulty: 10 units

Order Status:

Admin can check order status i.e. whether the package has been dispatched or not, processing, in transit, delivered etc. Delivery report will be generated by merchant about the Order Status.

Degree of importance: Essential

Difficulty: 20 units

Request for Order Status:

User can check request status i.e. if the product is available in the inventory, he will receive products very soon. But, if product is out of stock, then it will take some time.

Degree of importance: Essential

Difficulty: 20 units

Implementation:

So far, we have implemented the functionalities called login, search, updating profiles etc. But this increment majorly deals with shaping up the application. We have worked up on and implemented apposite Cascading Style Sheets (CSS) for it to be eye-candy. We also made many amendments to the third increment like adding up register option for users to get themselves registered so as to have their own account to access the services.

The following screenshots (in steps) help more fathoming the application more profoundly and clearly:

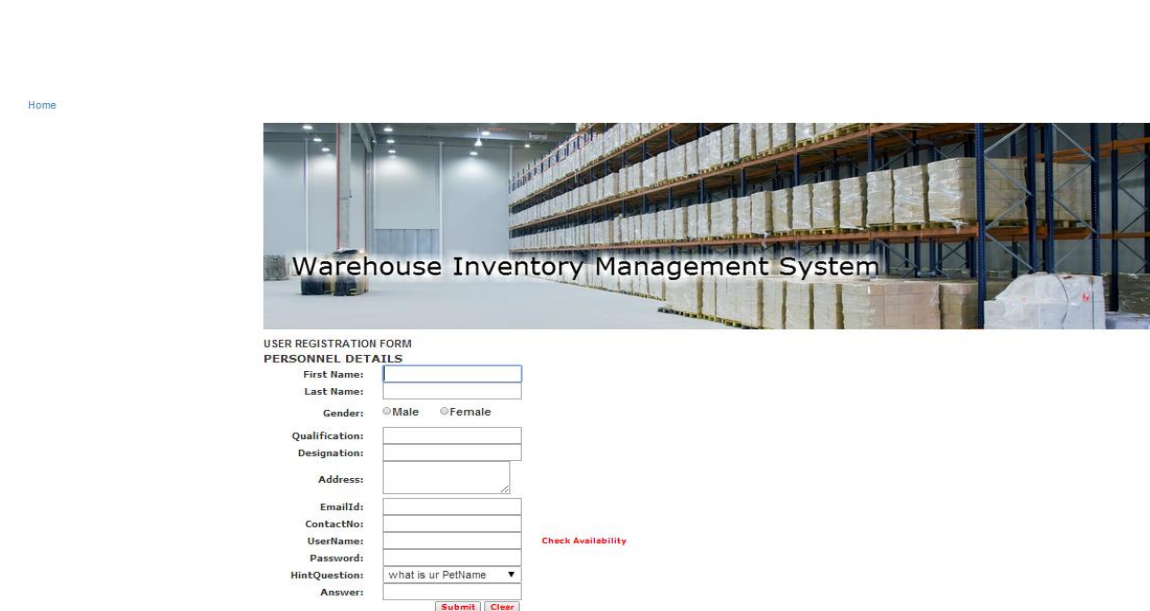

1. Login page

2. User Login page: User enters his details here and logs in. If he has no account, he clicks register option to get registered.

3. User enters his details here then clicks submit for them to be saved to the database.

4. The user home page looks like below:

5. When he clicks the first icon, search for items can be done by choosing through which the product can be searched i.e.; through vendor or product id.

The screenshot shows the search interface below the header. It features a 'Search Product' title, a dropdown menu currently set to 'vendor', an adjacent text input field, and a 'Search' button.

Search Product

vendor

6. After clicking search, the matching products according to the search name appears on the screen which also includes all details of the product like product number, product name and description, supplier name, order etc. He can order desired item by clicking on 'order' by mentioning required quantity of the product.

The screenshot shows the search results table after a search for 'amazon'. The table has columns for product selection, name, description, cost, quantity, supplier, and ordering options. Two results are shown: a 'Pen' and a 'Laptop', both supplied by 'Amazon'. Each row has an 'Order' link and a quantity input field.

Search Product

vendor

Select	Product Name	Product Description	Product Cost	Available Qty	Supplier Name	Order Qty	Order
<input type="radio"/>	Pen	pen	\$ 0000	27	Amazon	<input type="text"/>	Order
<input type="radio"/>	Laptop	laptop	\$00.0000	10	Amazon	<input type="text"/>	Order

Inventory Management System     

8. The payment is then made and the order has been sent to the admin to process it. Then, a message 'thanks for the payment' is displayed on the screen.

9. The second icon in the home page shows all the available order the user has made till then.

Inventory Management System     

10. The third icon is used for updating his profile by entering the new correct details and then submitting it. The details get stored into the database.

Inventory Management System

UPDATE PROFILE

PERSONNEL DETAILS

UserAccountId:	11
User Name:	Mounica
Qualification:	MS
DesiDesignation:	Student
Address:	UMKC
EmailId:	mouni@mail.umkc.edu
ContactNo:	8165430987

11. The fourth icon is all about enabling the user to change his password if required. He has to enter old and new passwords and then click 'submit'.

Inventory Management System

CHANGE PASSWORD FORM

User Name:	mouni
Password:	*****
New Password:	*****
Confirm Password:	*****

12. Here, if user tries to give both old and new passwords same, a pop up appears showing message 'Old and new passwords must be different'.

localhost:49943/Account/frmChangePassword

Inventory Management System

The page at localhost:49943 says:

Do u Want Update!

CHANGE PASSWORD FORM

User Name:	mouni
Password:	*****
New Password:	*****
Confirm Password:	*****

13. Admin Login: This is similar to the user login page.

[Home](#)

Password:

[Features](#) [About Us](#) [Contact Us](#) [Help](#) [Register](#)

14. Admin homepage gets displayed as the next page where there are several services.

15. The first icon here is displaying all the available orders and their details that users have made.

MANAGE ORDERS

	AdminOrderId	User Name	OrderStatus	Payment Done	Status	Payments	Products Orders				
Edit	2056	Mounica	Processing	Yes	Processing ▼	<div>PaymentAmount</div> 500.0000	ProductName	ProductNumber	ProductDescription	Cost	Quantity
							Laptop	P003	laptop	500.0000	1
Edit	2057	Mounica	Processing	Yes	Processing ▼	<div>PaymentAmount</div> 5.0000	ProductName	ProductNumber	ProductDescription	Cost	Quantity
							Pen	P001	pen	5.0000	1
Edit	2058	Mounica	Processing	Yes	Processing ▼	<div>PaymentAmount</div> 10.0000	ProductName	ProductNumber	ProductDescription	Cost	Quantity
							Pen	P001	pen	5.0000	2

16. The admin can edit the status of the order whether it is shipped or processing.

Inventory Management System

Customer Order SubTotal: \$10.00 Total: \$10.00

CHANGE PASSWORD

Logout

ProductID	ProductName	ProductNumber	ProductDescription	Cost	AvailableQuantity	Preview Image
1	Pen	P001	pen	5.0000	25	
7	Stapler	P002	Stapler	30.0000	10	
8	Laptop	P003	laptop	500.0000	10	
10	Pencil	P004	pencil	2.5000	100	
12	A4 sheets	P005	sheets	12.9900	100	

19. The third icon in this module is about suppliers. Suppliers are those who sends all the stock to the admin, who in turn sells to the users/faculty members at UMKC. Below are the details of all the associated suppliers and what all products they offer.

MANAGE SUPPLIERS

SupplierName	SupplierAddress	SupplierCity	SupplierState	SupplierCountry	Products			
Amazon	1234, lake avenue	Dallas	Texas	USA	ProductName	ProductNumber	ProductDescription	Cost
					Pen	P001	pen	5.0000
					Laptop	P003	laptop	500.0000
OfficeMax	4243, Main Street	Kansas City	Missouri	USA	ProductName	ProductNumber	ProductDescription	Cost
					Stapler	P002	Stapler	30.0000
					Pencil	P004	pencil	2.5000
OfficeDepot	8973, Park Avenue	Kansas City	Missouri	USA	ProductName	ProductNumber	ProductDescription	Cost
					A4 sheets	P005	sheets	12.9900
Walmart	645, Gregory Blvd II	Kansas City	Missouri	USA	No Data Available			

20. The fourth icon, here, is to manage users. The admin can view all the available users to check when ever required.

MANAGE USERS

Name	Qualification	Address	EmailId	ContactNo
Mounica	MS	UMKC	mouni@mail.umkc.edu	8165430987
Avani	MS	UMKC	avani@mail.umkc.edu	3249875467
1	2	3		

21. The changing password functionality is same as in the user module.

Home

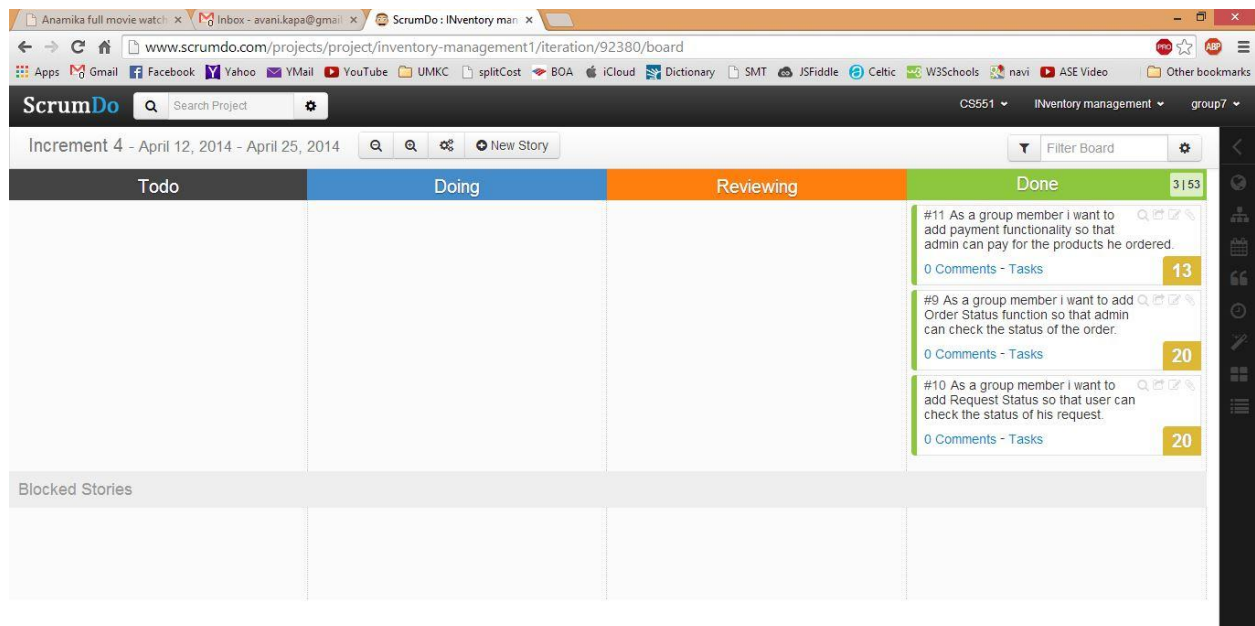

CHANGE PASSWORD FORM

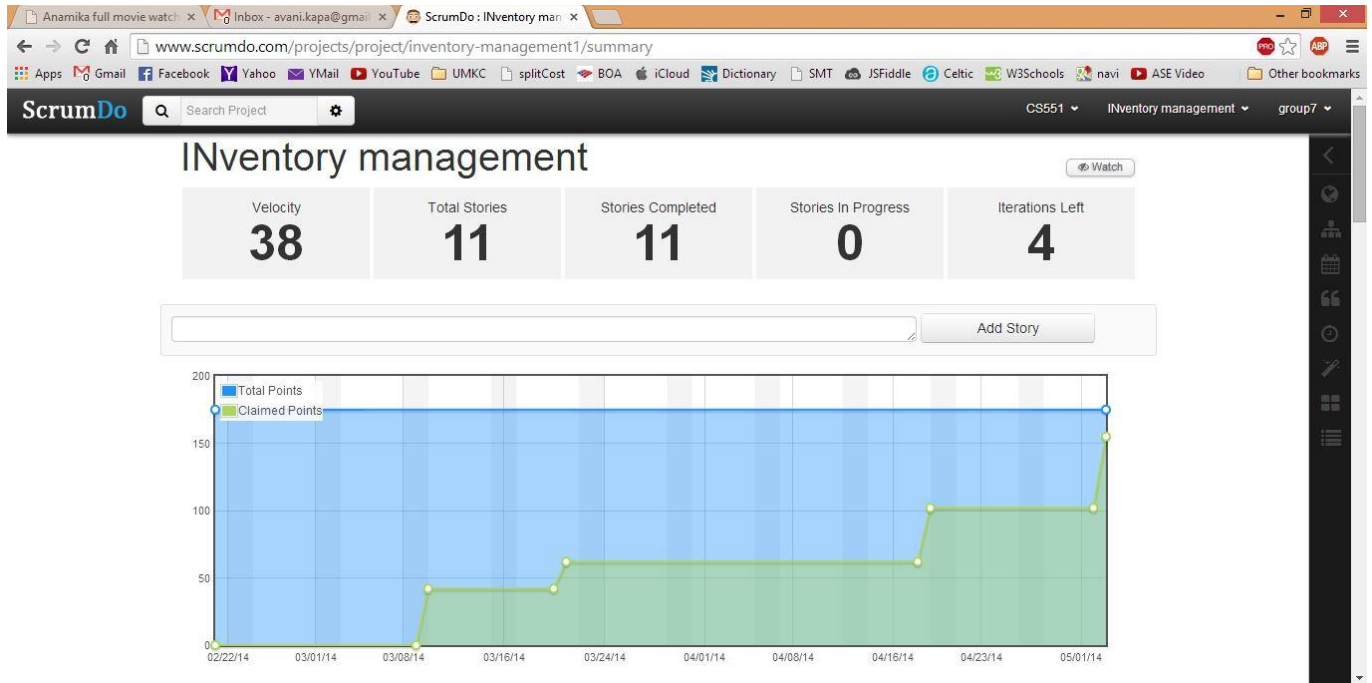

User Name:	admin
Password:	*****
New Password:	*****
Confirm Password:	*****
<input type="button" value="Submit"/> <input type="button" value="Cancel"/>	

So, this is the working of the web application which enables the users to do the calling at their comfort.

Describing in brief about the project increment with the help of ScrumDo, this can be shown below:

The summary of the entire project is shown below:
